

Need for Debt Advice in the UK - 2021

Westminster Parliamentary Constituency estimates

Version:

17/05/23:

Analysis based on Battese-Harter-Fuller Unit level small area estimation.

Data sourced from MaPS Debt Advice Needs survey (2021), and relevant local area auxiliary information (key demographics).

Variables used in the analysis are shown to the right:

Age
Rural Indicator
CCJ per Capita
No of Children
Education level - degree
Has Cash ISA
House Ownership
Income Level
Gender
Credit Card Monthly Spend
Percentage with Alternative Financial Products (Lowell)
Credit Card Usage per month
Credit Card Minimum Payment
Working Status

A final stage of analysis involved outlier identification and smoothing, which allowed us to calibrate areas which were not performing as expected.

Moreover, this step ensured our data was not wildly out of kilter with the likes of similar measures of Need for Debt Advice and our broader measure of Financial Wellbeing.

Lowell Financial Vulnerability Index (2021)

Financial Wellbeing Survey (2021)

CCJ per capita (registry-trust.org.uk)

Over Indebtedness (2020)

See below for further details on the Need for Debt Advice measure and the underlying survey source:

<https://moneyandpensionservice.org.uk/2022/02/23/who-needs-debt-advice-in-2022/>

NB: As this is a new measure we would advise against any direct trend comparisons with the legacy Over-Indebtedness measure.

Also note that estimates have confidence intervals, and so we would caution against implying high precision with these estimates.

All estimates are also predicated on the quality of the auxiliary data, for which MaPS isn't responsible for.
